The INTF document ID is of the form 4nnnn
 where nnnn is the numerical part of the GA lectionary name (leading zeroes as needed).
 The Content is as in Aland's *Kurzgefaste Liste*.
 The Cat(egory) is m=minuscul, U=uncial

Lectionaries listed by Burgon in *Revision Revised* are numbered by a #
 Of Burgon's 36 lectionaries quoted in *Revision Revised*:
 INTF images are available for 23, of which
 we have verified 21 (19 reading ΘεοϚ, 1 ΘεοϚ, 1 οϚ - these are in the table above).
 in 1 case (GA-101) there is an issue with manuscript legibility
 in 1 (I-37) case it is gospels-only, also as described by INTF Liste
 In 13 cases, no image is available, of which
 in 2 cases Burgon reports οϚ (I-463, I-464), but INTF Liste describes these as gospel-only.
 in 11 cases Burgon reports 10 ΘεοϚ, 1 οϚ ΘεοϚ (I-597).

The manuscript labelled 101 is a consecutive-NT manuscript, according to Scrivener containing a lectionary part.
 But it is partly illegible, and we cannot confirm that it contains an ADDITIONAL reading of 1 Tim 3:16.
 Even the consecutive-NT reading of 1 Tim 3:16 is illegible to us from the image (950, column 2).

The unresolved cases of Burgon's list, where the readings claimed are in square brackets, and need checking, are
